
Extreme Heat Action Plan

Why the plan?

- Hot days are becoming hotter and more frequent. The risk is widespread but not distributed equally.
- Extreme heat is a major public health concern and also impacts economy, infrastructure and well-being
- Heat adaptation is opportunity to provide multiple community benefits.

About the Plan

- Grant from the Office of Land Use and Climate Innovation
- In partnership with the San Diego Regional Climate Collaborative, Scripps Institution of Oceanography and the cities of Chula Vista and La Mesa
- Develop Extreme Heat Action Plan for City of San Diego as well as suite of other resources (Urban Heat Risk Explorer, Cooling Solutions Toolbox, informational outreach materials, demonstration projects, etc.)

Next Steps

- Survey live through end of August
- Community workshops in the fall
